### **August 27, Special Edition**

#### **ASSET CHANGES/UPDATES:**

The following changes were made to the ASSET Production and Training environments over the weekend of August 25<sup>th</sup>, 2007

#### **Changes to ASSET System Reports:**

Case Manager was added as new search criteria on the **Supplemental Data Report** and the **Case Managed Veterans Report**.

#### **Case Manager Field Change:**

The sort logic for the Case Manager Field in ASSET (dropdown listing) has changed. Previously, the sort divided the list into values with names beginning with capital letters at the top of the list and those with lower case at the bottom of the list. The change is that the sort simply ignores case (upper/lower).

#### **Update ASSET to Visual Basic 2005:**

Changes were made to all of the pages, in ASSET. You will see a new background color and other upgrades. Staff have the option, to select either the new default color or the old background color by changing the setting on 'Staff Information page' for 'Color Scheme' to 'Classic'.

#### **Oracle 10g.Upgrade:**

Our Oracle database was upgraded on Saturday, August 25<sup>th</sup>, to Oracle 10g. Oracle's 10g is a grid producing product group that includes a database management system (DBMS) and application server products that automate many database management tasks.
