SSN Validation (MCI) training videos distributed week of Aug. 7

Training videos for the new SSN Validation process will be distributed to local agencies beginning the week of August 7. DWS will only release these videos to agencies that have submitted their SSN validation security access spreadsheets which identify users within an agency who are authorized access to the SSN validation process.

Videos will be released as follows: Job Service staff who are connected to DWD's Wide Area Network (WAN) will have the videos "pushed" to their desktop. Agencies not connected to DWD's WAN will receive the videos on a compact disk. Only one disk will be distributed per agency. It can be copied onto individual computers or onto a network drive.

Agencies that have not yet submitted their security request spreadsheets are encouraged to do so as soon as possible. SSN Validation functionality will be added to ASSET over the weekend on August 18.

Questions regarding the spreadsheet can be directed to Joanie Kanter at 608-267-1431. If after August 21 you don't have access to SSN validation process and you feel you should, direct those questions to Joanie Kanter at 608-267-1431.

Questions about the training videos should be directed to Kevin Clough at 608-267-8914.
