Wisconsin Workforce Programs Performance Summit Training Opportunity

Knowing How Your Program is Doing, Sooner: Using Real-Time Measures to Manage for Quality Services for Wisconsin's Workforce Programs

So much is riding on program outcomes. Case managers and program managers, how can you know sooner whether you are heading in the right direction and where you might need to make changes to improve the quality of your participant outcomes and your overall programs?

In this workshop we will explore how you can improve performance and management of your case loads and programs by focusing on key participant outcomes. You will also see how real-time indicators help determine whether your case loads and programs are on the right track in achieving key outcomes and goals. Several activities will allow you to apply what you are learning to your own state and local area context. In particular, this workshop will look at indicators that can help project outcomes under the Common Measures.

The workshop will occur in two tracks: one for Youth program managers and staff, and one for Adult/Dislocated Worker/Wagner-Peyser/VETS/TAA program managers and staff.

The Performance Summit will also include information on data quality and its relationship to data validation – a US Department of Labor perspective, as well as a briefing on the TESSA System.

See “Additional Relevant Information” for Summit Attendees Pre-requisites.
