

ASSET TECHNICAL BULLETIN-10-22-2007

From: Bureau of Program Management & IT Coordination

Subject: Warehouse of Generations

Please refrain from running WEBI reports today. The current warehouse load is running twice for the same week, resulting in duplicate data.

We're currently working to fix the problem and will schedule a warehouse load tonight to fix this. We will let user's know when the problem is corrected.

We apologize for the inconvenience.
