

Employer Record System (ERS) Training

Training on how to use the Employer Record System, and its query function (for mailing labels, reports, lists) will be offered this fall. At this time I am determining how many people would attend a day of training, and where in the state they are located. These factors will influence how many classes are offered, and where.

If you are interested in attending training (this is for anyone - new users as well as those who attended training in the past but need a refresher on how to use the system), or have staff who are interested in attending training, please reply by email with the number of people and where in the state you are located. This is not registration for the training - just a survey of how many people will attend.

Thank you for your assistance in planning this next round of training!
