Important! Resetting Employer Passwords in WJOS

This morning we discovered that when staff are resetting an employer's password in WJOS, they are getting either a blank screen or a message asking if they want to debug after they click on the Password Reset button. The employers' passwords **are** being reset to the standard password.

The problem will be fixed this coming weekend when some other planned changes will also be made. In the meantime, we wanted to alert job order staff to this situation. Thanks for your patience.
